Subject Index

Acidified serum 78
Acid phosphatase isoenzymes 105
Acute childhood lymphatic leukemia (ALL) 322
Acute leukemia 105, 115, 317
Acute lymphoblastic leukemia (ALL) 13, 252, 297
Acute lymphoblastic leukemia of null cell type 195
Acute lymphocytic leukemia in childhood 321
Acute myelogeneous leukemia (AML) 361
Acute myelogeneous leukemia 115
Administration of anti-lymphocyte globulin 351
Adrenocortical steroids 69
Adriamycine 321
Adult T-cell leukemia (ATL) 1
Advances in BMT, UCLA Symposium 361
ALL-hand-mirror cells 297
ALL hand-mirror cells, adenosine deaminase activity 300
ALL hand-mirror cells, cytochemistry 300
ALL hand-mirror cells, immunological surface markers 300
Allogeneic marrow transplantation 355
Alloimmunisation 203
Anemia 61, 131
Anemic rabbits 133
Antigen-presenting macrophages 263
Ia antigens on canine alveolar macrophages 263
Anti-lymphocyte globulin 351
Antithrombin III abnormality 93
Antithrombin III Ann Arbor 99
Antithrombin III Budapest 99
Antithrombin III Padua$_2$ 93
Anti-T monoclonal antibodies 249
Anti-tumor effector cells 225
Aplasia, duration of – 359
Aplastic anemia 317
Ara-C 321
Ascorbic acid 65
L-asparaginase 321
Autologous bone marrow transplantation 203
Autologous bone marrow transplantation: leukemia 363
Autologous bone marrow transplantation: lymphoma 363
Autologous bone marrow transplantation: solid tumors 363

B-cells 153
B-cell differentiation 188
B cell leukemia/lymphoma phenotypes 254
Beta-globin chain synthesis 283
BFU-E 351
Bleeding, prophylaxis of – in autologous bone marrow transplantation 203
Bone marrow 317
Bone marrow cell dose 355
Bone marrow cultures 287
Bone marrow depression 318
Bone marrow mononuclears, immuno-electron microscopy 343
Bone marrow neutrophils 271
BMT for acute myelogeneous leukemia 361
Bone marrow transplantation 355
Bone marrow transplantation, Advances in –, UCLA-Symp. 361
Bone marrow transplantation for ALL 363
Bone marrow transplantation, complications 366
Bone marrow transplantation, GvHD 359
Bone marrow transplantation without HLA-matched donor 366
Bone marrow transplantation for immunodeficiency 365
Bronchoalveolar cell, morphologic analysis 265
Bronchoalveolar cell, surface markers 266

Cancer cytogenetics 195
Canine bronchoalveolar cells 263
Cell-mediated immune response 78
Cell surface antigens 247
CFU-C 31, 211
CFU_{GM} 317
CFU_E 317, 351
CFU-L 351
CFU_s 343
Circulating erythroid progenitors 131
Childhood ALL subclassification 105
Chloramphenicol (CAP) treatment 318
Chloramphenicol and Thiamphenicol, comparison 317
Chromosome aberrations 195
Chronic idiopathic thrombocytopenic purpura 69
Chronic lymphocytic leukemia 256
Chronic T-leukemia 253
Clonogenic cell population in leukemia/lymphoma 253
CNS irradiation 321

Colony forming unit 139, 211
Colony-stimulating factor 211, 317
Common ALL antigen 254
Complete aplastic anemia 317
Concanavalin-A 79
Cranial irradiation 322
Crossed immuno-electrophoresis 93
Cryopreserved autologous platelets 203
CSE (Cystathionase) 31
Cyclophosphamide 321
Cyclosporin A 359
Cystathionase (CSE), cytoplasmic marker of hematopoietic differentiation 31
Cystathionase content in leukemie cell lysates 33
L-cystathionase 31
L-cysteine 31
Cytomegalovirus infection 203
Cytoplasmic fibrils 16
Cytosine-arabinoside (Ara-C) 322

Desferrioxamine 64
Differentiation antigens 247
Dipeptidylaminopeptidase IV 333
DNA synthesis 317
Duration of leukopenia 355
Dyserythropoiesis 317

Early promyelocytes 274
Effect of splenectomy 307
Enzyme cytochemistry 333
Enzyme markers 105
Eosinopenia 287
Eosinophil chemotactic factors, mediators 287
Eosinopoiesis 287
Eosinotaxis 287
E-RFC 351
E rosette forming cells 351
Erythroid burst forming units 351
Erythroid colony forming units 351
Erythroid progenitors 131
Erythropoiesis 62, 131
European red deer (Cervus elaphus) 85

FAB-criteria 157
Factor X deficiency, chromogenic substrate 53
Factor X deficiency, electroimmunoassay 53
F_c receptors for IgG 351
F_c receptors 333
^{59}Fe-incorporation into heme 135
Ferrioxamine 65
Fetal liver transplantation 365
Follicular lymphomas 256
Friend leukemia 139

Graft versus host disease 203, 368
Granular endoplasmic reticulum 343
Granulocytopoietic kinetics, microdensitometry 271
Granulopoiesis 271
Granulopoietic kinetics and neutrophil primary granules 271

Haemoglobin S 279
Haemophilia A 311
Haemophilia B 311
Hairy cell leukemia 307
Hand-mirror cells 297
Heavy chains 147
Helper cells 185
Helper/suppressor balance in Haemophilia B 311
Helper/suppressor T cell subset 311
Helper T lymphocytes 333
Hematopoietic differentiation 31
Hemopoiesis 131
Hemopoietic stem cells 139
Hemorheology 85
Heparin Co-factor activities 93
Heterogeneity of leukemic Sézary cells 333
Hodgkin's disease 41, 153
Hodgkin's disease, lung involvement 231
Hodgkin's disease, therapy 231
HTL virus antibody-positive adult T-cell leukemia patients 5
HTLV, comparison of HTLV isolates, detection of a second strain 7
HTLV-infected cells, properties 8
HTLV-specific antibodies 4
Human macrophage cytotoxicity 225
Human malignant T cells, comparative phenotypic characterization 252
Human placenta 211
Human T cell, differentiation pathways 249
Human T-cell leukemia 1
Human T-cell leukemia/lymphoma virus (HTLV) as a unique human retrovirus 2
Human thymocyte differentiation 249
Hyperthermia and macrophage cytotoxicity 225

Idiopathic hemochromatosis 61
Idiopathic thrombocytopenic purpura in adulthood 69
Immunodiagnosis of cell types 247
Immunofluorescence with monoclonal antibodies 237
Immunoglobulin 147
Immunoglobulin, intravenous 69
Immunological cell markers 196
Immunological diagnosis 157
Immunosuppressive drugs on T cells 351

Indium^{111}-Oxine labelled lymphocytes 78
Infections post bone marrow transplantation 369
Interstitial pneumonitis 366
Intestinal iron absorption 61
Intracytoplasmic inclusions in cells of acute lymphoblastic leukemia, electron microscopy 13
Intravenous immunoglobulin 69
Iron balance 61
Iron chelating agent, properties 64
Iron overlod, treatment with chelating agents 61
Isoenzyme patterns of acid phosphatase 105

Late promyelocytes 274
Leukemia 31, 355
Leukemia, acute lymphoblastic 195
Leukemia in infancy 195
Leukemia subtypes 157
Leukemia subvariants 106
Leukemia hairy cells 307
Leukemia Sézary cells 333
Leukopenia, duration of — 355
Leukotrienes, chemoattractants for neutrophils 293
Light chains 147
Lymphatic leukemias and lymphomas 247
Lymphoblastic lymphoma 252
Lymphocyte antigens 247
Lymphocyte function 77
Lymphocyte subsets 41
Lymphocytic chimaerism 197
Lymphokines 225
Lymphoma virus 1
Lymphopoiesis 247
Lymphoproliferative disorders 153

Macrophage cytotoxicity 225
Malignant lymphoid cells 105
Marrow cell dose 355
Membrane-bound polysome 147
L-methionine
Methotrexate 321, 358
Mice liver 139
Mitochondria 13
Moderate anemia 317
Monoclonal antibodies 41, 157, 237, 247, 263, 333
Monoclonal antibodies against lymphocytes 256
Monoclonal antibodies, problems and pitfalls 248
Monoclonal antibodies in therapy 257
Mouse bone marrow mononuclears (BMM)
Mouse myeloma 147
Myelodysplasia 317
Myeloid leukemia 157
Myeloperoxidase deficiency in preleukemia, bactericidal activity 28
Myeloperoxidas deficiency in preleukemia, Candida albicans 28
Myeloperoxidase deficiency in preleukemia, oxygen consumption 21, 23

Naphthol-AS-D-chloroacetate esterase activity 271
Natural killer cells 333
Neutropenia 317
Neutrophil primary granules 271
Neutrophilic granulocytes 271
p-Nitrobenzaldehyde 318
Nitroso-Chloramphenicol 318
Nodular lymphomas 256
Non-Hodgkin lymphomas 41, 153
Non-myelogenous leukemia 115
Nonsecretory myeloma 147
Nuclear/cytoplasmic ratio 343

Opsonization defect 21
Oxigenated sickle cells 85

Paroxysmal nocturnal hemoglobinuria 77
Peroxidase 115
Peripheral blood mononuclear cells 351
PHA-induced human T-lymphocyte colony formation 351
Platelets, adhesion of — to the subendothelium 123
Platelet aggregation by ristocetin 123
Platelet counts 69
Pluripotent hemopoietic stem cell 343, 344
Poly-λ-lysine coated slides 237
Prednisone 321
Preleukemia 21
Preparative isolation 211
Procoagulant factor VIII 123
Prolymphocytic leukemia 256
Protein synthesis 307
Protein synthesis in hairy cell leukemia 309
Pure red cell aplasia 351
Purification of human colony-stimulating factors 211
Purpura, chronic idiopathic thrombocytopenic 69

Rabbits 131
Rabbit anti-mouse brain serum 343
Red cell iron 62
Rough endoplasmic reticulum 147

Sandoglobulin 69
Sézary cells 333

Sickle cell phenomenon 85
Sickle cell-ß$^+$-thalassaemia, haematological parameters 279
Sickle cell-ß$^+$-thalassaemia, heterozygosity 279
Sideroblastic anemia 318
Specific translocation t (4; 11) 197
Splenectomy, effect of — 307
Splenic lymphocyte subpopulation 41
Staphylococcus aureus 21
Streptomyces pilosus 64
Suppressor cells 185
Systemic lupus erythematosus 69

T-cells 153
T-cell leukemia/lymphoma virus 2
T-cell leukemia/lymphoma virus and adult T-cell leukemia, etiologic relationship 1
T-cell subpopulations 311
T-cell subsets 78
Thalassemia 61
Thiamphenicol 317
Thiamphenicol, toxic effect 318
Thrombocytopenia 317
Thy-I-antigen 344
Thymus extract 153
Thymus immunophysiology 249
^{3}H Thymidine 317
Thymustimulin (Tp-1) 153
T-lymphocytes 153
T-lymphocyte colonies 351
T-lymphocytes colony forming cells 185
T-lymphocytes, grown in semisolid agar 185

UCLA Symposium: Advances in BMT 361
Ultrastructural analysis 147

Vincristine 321

Waldenström's macroglobulinemia 256
v. Willebrand's syndrome 123
